Editor's Note-Book

Robert Collins (*Rock mappers*), freelance author, has been writing for magazines since 1951. He has been on the staff of *Reader's Digest* and *MacLean's*, and was editor of the *Imperial Oil Review* for six years and of *Toronto Life* for two years. Mr. Collins is the author of five books, three non-fiction and two juvenile fiction. His articles have appeared in numerous

publications such as *Weekend*, *Reader's Digest*, etc. In addition, Mr. Collins is teaching a course in journalism at the University of Western Ontario.

Denis Harvey (*Rainbows — a new prairie crop*), prior to recent retirement from the federal Public Service, worked for a number of years in collaboration with officials from three provincial governments and the Northwest Territories studying the problems of

the western freshwater fisheries. Those studies led to the creation of the Freshwater Fish Marketing Corporation and he was the first Chairman of its Board of Directors. In that capacity, and from the previous work, he had the opportunity to become familiar with conditions in those fisheries and with the various government programs designed for their assistance. Mr. Harvey is a keen fly fisherman with an active interest in the maintenance and
